

ABOUT THE SPEAKERS

Vicki Bedes, COVT, began VT training under Behavioral Optometry pioneer, Dr. Leonard Emery. She has lectured on motor testing, sports vision, vision and learning, TBI procedures, and trampoline and directionality. She co-authored, "Eyes on Track: A Missing Link to Successful Learning," with Dr. Kristy Remick, and "The Vision Therapist's Toolkit" with Tom Headline and Irene Wahlmeier. In 2005 She won the Lora McGraw award. She works with Dr. Richard Borghi, Granite Bay, CA.

Michele R. Bessler, OD, FCOVD, graduated from the SUNY State College of Optometry in 1991 and completed a residency in Vision Therapy and Vision Rehabilitation in 1992. She was Assistant Clinical Professor for 12 years in the SUNY Pediatric, Vision Therapy and Learning Disability Clinics. She has been in practice for 18 years and lectures extensively on vision therapy for learning related vision disorders, and on the visual effects of acquired head trauma and their remediation.

Lisa M. Edwards, OD, graduated in 2006 from the Southern California College of Optometry (SCCO) in Fullerton, CA where she also completed a residency in Pediatric Optometry and Vision Therapy. She is currently a full-time faculty member at SCCO. She staffs third and fourth year interns in the pediatric and vision therapy services and teaches pre-clinical labs each quarter.

Leanna Dudley, OD, graduated from Pacific University College of Optometry with honors and recently completed a residency program at SUNY College of Optometry with emphasis on vision therapy, pediatric examinations, and traumatic brain injury. Dr. Dudley is an active member of the AAO, COVD and the AOA and plans to pursue fellowship in these organizations to further her educational development.

The 2010 California Regional Vision Therapists' Forum promises to live up to its reputation as one of the best behavioral para-optometric educational conferences. This conference provides 12 hours of continuing education credits. It will offer interactive, informative and timely topics and provide usable applications which can be immediately implemented in the vision therapy room.
