Basic Introduction to Behavioral Vision Care:

This Webinar is for those looking for information on the behavioral vision care model of Optometry.

Date: May 18th, 2020

**One over the Internet session:
from 6:30 AM - 8:00 PM EST**

Robert Hohendorf, OEP CC Prof Emeritus

Conference Location

Over the Internet

Course Description/Highlights

Learn about All This in the comfort of your home or office.

The Optometric Behavioral Care Model was not taught very well in most Optometry schools. Even current state and school CE seem to be repetitions of the same subjects and information."

"Basic Introduction to Behavioral Vision Care" will help you gain better insight and answer some questions regarding:

How does Vision Care based on a Behavioral Model allows Optometry to serve more patients in more ways.

How can you grow a private practice through serving/helping a broader range of conditions and high levels of patient satisfaction.

Your drive to become the best is fueled by your experience with patients (they do call it a "practice") along with further education. It does take a dedication to helping your patients and a "thick skin" attitude and time to become comfortable with the research, the logic and the results of this exciting model of optometric care.

Length: 1 1/2 hours .

Continuing Education Credits: 1 1/2 hours

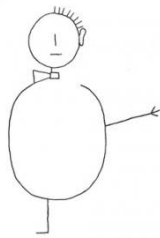

Prerequisite:

- Optometrists
- Aspiring O.D.
- New VT providers

This course has limited registration.

This course is structured as:

- One over the Internet introductory sessions of 1 1/2 hours.

Basic Introduction to Behavioral Vision Care, Webinar

May 18th, 2020
Over the Internet

Event Details

(continued)

Do you want to expand the full scope of your Optometric responsibility and care to grow your practice (Infants, Rehabilitation, Sports, and Visual Training), then this is a basic course for you?

Any Continuing Education takes a commitment of time and financial resources. CE credits are necessary for re-licensing. Why not expand your comfort level with a behavioral vision care model of optometry instead of rehashing the same topics we seem to get at school and State sponsored seminars.

So we invite you to learn about offering a service that although outside many insurance coverages, is unique to the field of Optometry?

This course can help to do that.

Recommended Equipment:

Computer / laptop/ tablet equipped with sound and video capabilities

Registration

Maximum registration is 20 participants so register early!

Registration can be done by completing and faxing the attached form.

Students and Residents are complimentary (on a space available basis) thanks to generous donations made by our Clinical Associates and by donations to the Optometrists Change Lives Fund. Please consider making a donation when you pay your registration so we can continue to offer this tremendous opportunity!

Conference registration includes:

- Admission to the conference
- Continuing Education Certificates
- Background Material
